

IO3 Testing scenario to collect feedback about the **Self-assessment features** on the Cities of Learning platform

Self-assessment features should include the following:

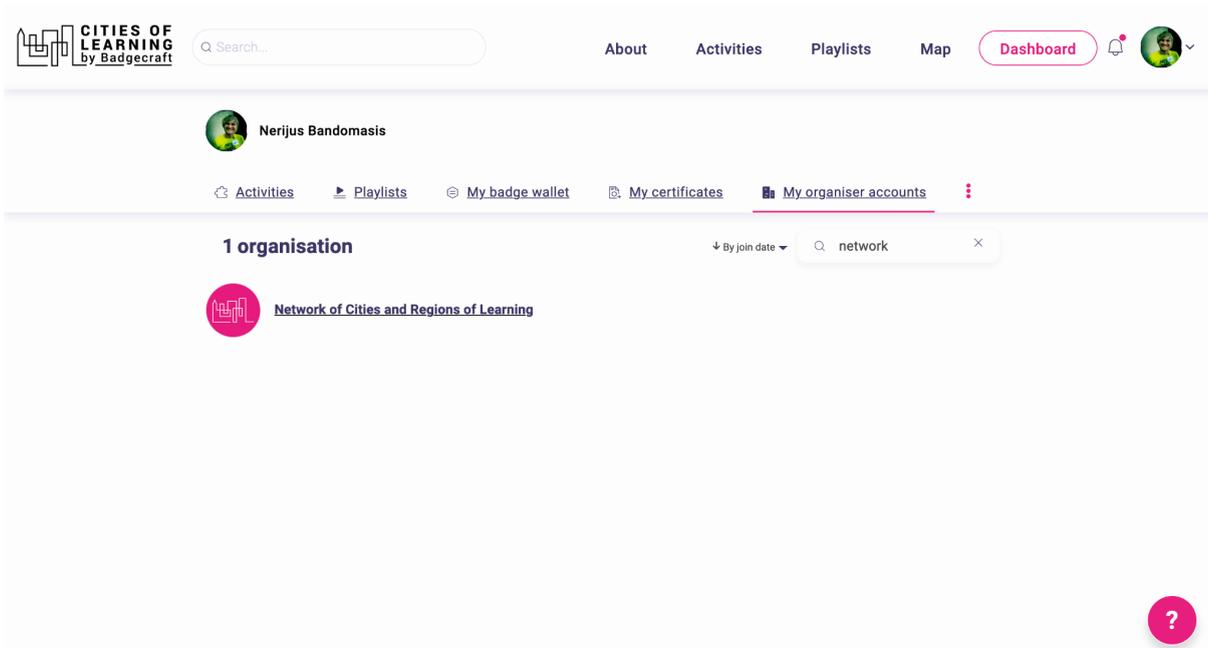

- Self-assess skills, prior learning and performance along a particular qualification framework or occupational standard.
- Gather evidence that showcases skills, competences and experiences.
- Have a visual overview of skills self-assessment.
- Identify personal strengths, and prioritise needs and goals for personal and professional development.
- **Not yet been released.** Organisers can upload and use skills and competence models for self-assessment and prior-learning validation.

Please, take the following steps to test the self-assessment features from the learner's perspective.

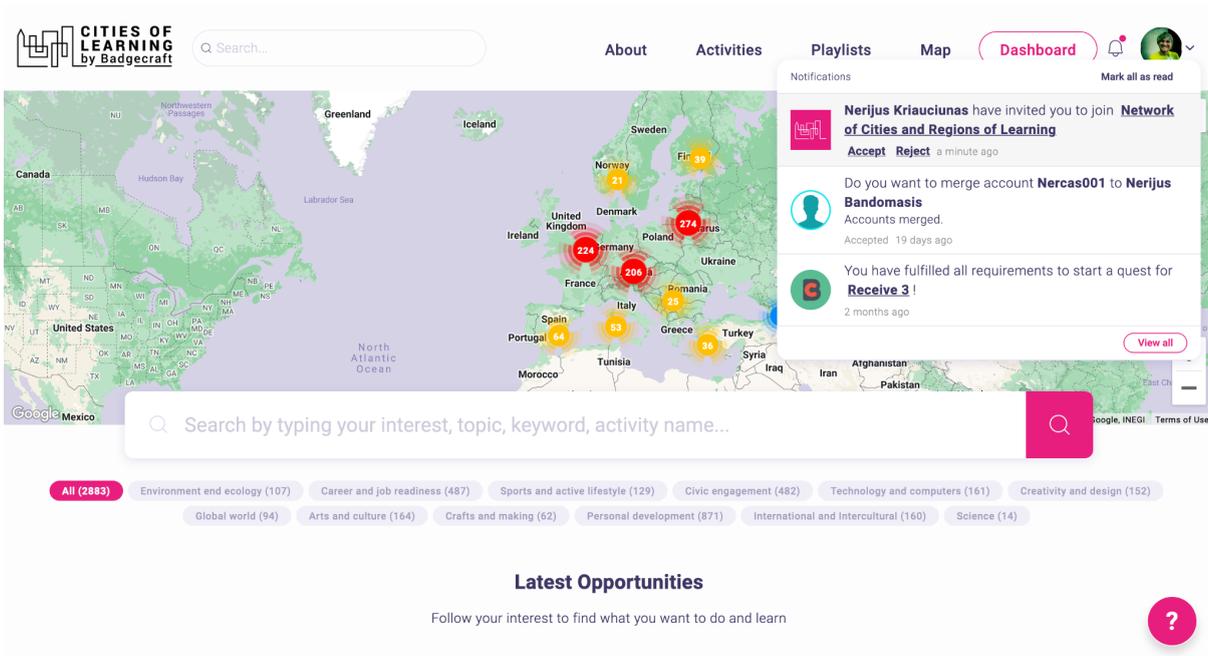

1. Go to <https://www.global.cityoflearning.eu> and make sure you are **logged** in to the [Cities of Learning platform](#) with your **Personal account**.

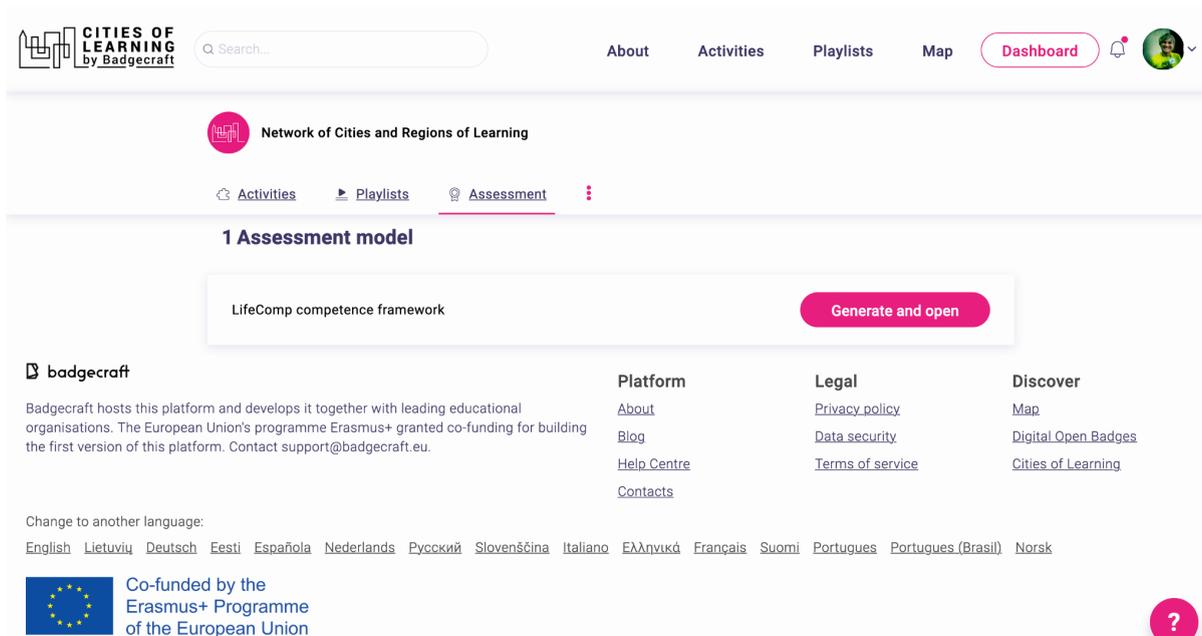

2. Make sure you have joined the **Network of Cities and Regions of Learning Organiser's account** as a user. Go to [Dashboard](#) > [My organiser accounts](#), then search for the Network of Cities and Regions of Learning and click on the [Organiser's name](#).

2.1. If you do not see this **Organiser** on the list, ensure you received and **accepted the invitation** to join this account. Check the **Notifications bell**, **accept the invitation**, and refresh the page again. Or you can also use this [auto-join link](#).

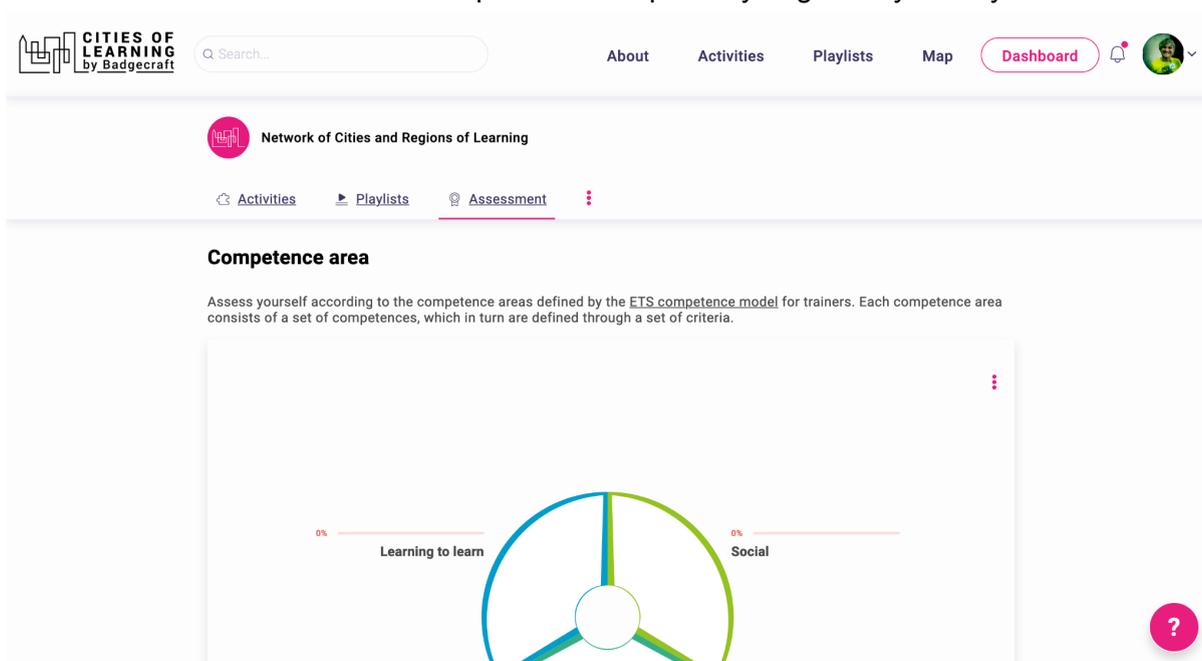

3. Inside the Network of Cities and Regions of Learning Organiser's account, go to the **tab "Assessment"** and **Generate and open** the LifeComp competence model.

4. **Navigate** freely through the LifeComp competence framework to **complete self-assessment**. Then doing a self-assessment, **take notes on the following user experience aspects**:

- 4.1. How easy or difficult is it for you to understand what you see and what you can do in various self-assessment places/pages? On a scale from 1 - 'difficult' to 10 - 'easy'.
- 4.2. What is the most difficult to understand? What is not clear at all?
- 4.3. What do you like, especially about the self-assessment features?
- 4.4. What is missing for learners to use self-assessment features to benefit the most?
- 4.5. What goals can learners achieve by using the self-assessment features?
- 4.6. Let's dream! In the ideal world, what else adult learners may want to do and achieve while using self-assessment features on the Cities of Learning platform?
- 4.7. Use the "?" mark on the platform to report any bugs that you may encounter.

5. After completing the self-assessment's user experience testing, fill in this feedback form: <https://forms.gle/QXXaxHgEDjN4Fdze8>
